FIRST RESPONDER PROJECT

AUTO SALVAVITA. TOGETHER TO SAFEGUARD LIFE.

A community initiative: dedicated vehicles with AED equipment and certified volunteer operators, supporting safety across the region.

TOGETHER TO SAFEGUARD LIFE.

PROJECT MISSION

Strengthening local safety and a culture of first response.

DEDICATED VEHICLES

Recognisable cars equipped with an AED (automated external defibrillator).

AED-CERTIFIED VOLUNTEER OPERATORS

Volunteers trained and certified in AED use.

EXPERIENCE & TRAINING

Documented operator experience and training.

COMMUNITY INITIATIVES

Awareness projects and local collaboration.

SUPPORTING COMPANIES

Company support makes the project possible.

HOW TO JOIN

Companies and volunteers can support or take part in the project.

First Responder activities are a social, volunteer project: they are not commercial medical transport services and do not replace public emergency services (144).

WE ALSO HAVE PROGRAMS

OUR PROGRAMS.

Diagnostic Core 10 (DC10) is a Medical Intelligence platform that combines clinical data, diagnostic exams, multi-model AI, scientific evidence and medical expertise to support clinical decisions.

Diagnostic Core 10
diagnostic-core-10

AI ANALYSES. THE DOCTOR DECIDES.

LABORATORY INTELLIGENCE

Blood test management with trend analysis, reference ranges and anomalies.

ECG INTELLIGENCE

Dynamic ECG viewer with structured trace analysis.

MEDICAL IMAGING

Viewing of CT, MRI, X-ray and ultrasound with advanced tools.

DOCUMENT INTELLIGENCE

Secure document upload and OCR extraction of key information.

CLINICAL SAFETY ENGINE

Red flag detection, Danger-First Check and prioritised Medical Alert Center.

AI CONSENSUS

Multiple AI models analyse in parallel and compare convergences and divergences.

PRINCIPLES

- Clinical safety first
- Every hypothesis must stand up to verification
- Full traceability back to the source
- The final decision remains clinical
